SUMMARY

Full Stack Developer with a strong foundation in front-end and back-end technologies including JavaScript, React.js, Next.js Node.js, Express.js, and MongoDB. Skilled in developing RESTful APIs, and managing databases through academic and personal projects. Committed to writing clean, efficient, and maintainable code while continuously learning modern development practices.

EDUCATION

Mumbai University : A.C Patil college of engineering   **Mumbai**
Bachelor of Computer Engineering   **Nov 2020 – June 2024**

- **Cumulative CGPA**: 7.1

PROJECTS

JobHunt:

- Build **full-stack** job portal with role based authentication for job seekers and recruiters, secure authentication & authorization using JWT and applied **debouncing technique** in signup form to showing missing details.
- Enabled job seekers to search, filter, and apply to jobs with a dedicated profile card showing personal details and applied jobs.
- Developed recruiter features to create company profiles, post jobs, and edit/manage job listings.
- Integrated **Redux** for efficient state management and smooth data handling across components.
- Project Link | Github

Recipe Finder:

- Developed a Recipe Finder web application using a third-party API to fetch and display recipes dynamically. Implemented an intuitive search functionality allowing users to search recipes by keywords.
- Integrated **Context API** for state management to build a favorites feature, enabling users to save and manage their preferred recipes.
- Project Link | Github
